

## Certificate of Conformance

1<sup>st</sup> January, 2020

Dear Valued Customers,

This is to certify that the new 8 inch Anti Telescoping Device (ATD) design part(s) of LG Chem NanoH<sub>2</sub>O™ Reverse Osmosis (RO) membranes will not affect the membrane performance, and elements meet all product specification, effective from 1<sup>st</sup> January, 2020 onwards.

While integrated with current ATD and new one in the same pressure vessel, the performance continues same and the brine seal and interconnect have no change as well.

Best regards

LG Water Solutions, part of LG Chem, Ltd.
